Modern look straight glass design serve-over counter with enlarged exposition space for an eye-catching food presentation, suitable for a wide variety of products. Ventilated circulation of chilled air ensures even cooling throughout the whole product display area without drying out the product on display. The evaporator of the Oak Valley SPACE QB is located in the back wall of the counter, ensuring easy maintenance and cleaning.

For better energy efficiency, the serve-over counter is available with glass doors, reducing the energy needed to maintain the right temperature inside. The counter can be chosen with lift-up or tilt-down front glass, making it easy for the store staff to access and tidy the counter. A variety of accessories for an ergonomic and more organized display are available.

The modular counter system is fully multiplexable. Refrigerated, neutral, and hot food options can be joined into lines of the Oak Valley QB display. The counters can be complemented by rounded corner angles, creating a light and stylish look, maximizing the impact of the products in terms of visual merchandising.
