

# Supermarket & C-Store Line

New plug-in and remote solutions for supermarkets and C-Stores. With new technology, fans and electrical components to reduce energy.

# FLORIDA OV

## World Class Integral Equipment

Our new FLORIDA OV range provides every possible solution a store needs; from glass door to open chillers, low, mid height islands and complementary full glass door frozen food cases.

Building on the success of the previous model, we launched our new Florida OV Glass Door at Euroshop 2020. At Rimasee we continue to demonstrate how we are able to drive the latest technology and innovation into our world class integral equipment.

The new glass door model features new evaporators, fans and controls to deliver greater reliability and outstanding energy savings.

We strive to reduce energy consumption by enabling technologies for excellent refrigeration performance.

### **Even Lower Energy Bills**

The 2020 Florida OV-GD delivers an extra 25% energy saving over the older model. That means a 2.5m model costs just \$1 per day to run!

### **It's very quiet**

The running noise is as low as 54DbA – compare that to the typical noise experienced in the average convenience store and 54DbA is practicably a whisper!

## A valid alternative to remote

The significant reduction in energy consumption. The noticeable lowering of the noise level and heat rejection compared to standard integrals makes the Florida Overview an exceedingly valid alternative to a conventional remote system.

Our new Florida OV range provides every possible solution a store needs; from glass door to open chillers, low, mid height islands and complementary full glass door frozen food cases.

Replace your refrigeration equipment overnight with the new Florida Overview range and you will only need to plug it in to a standard 13 amp socket and you are good to go.

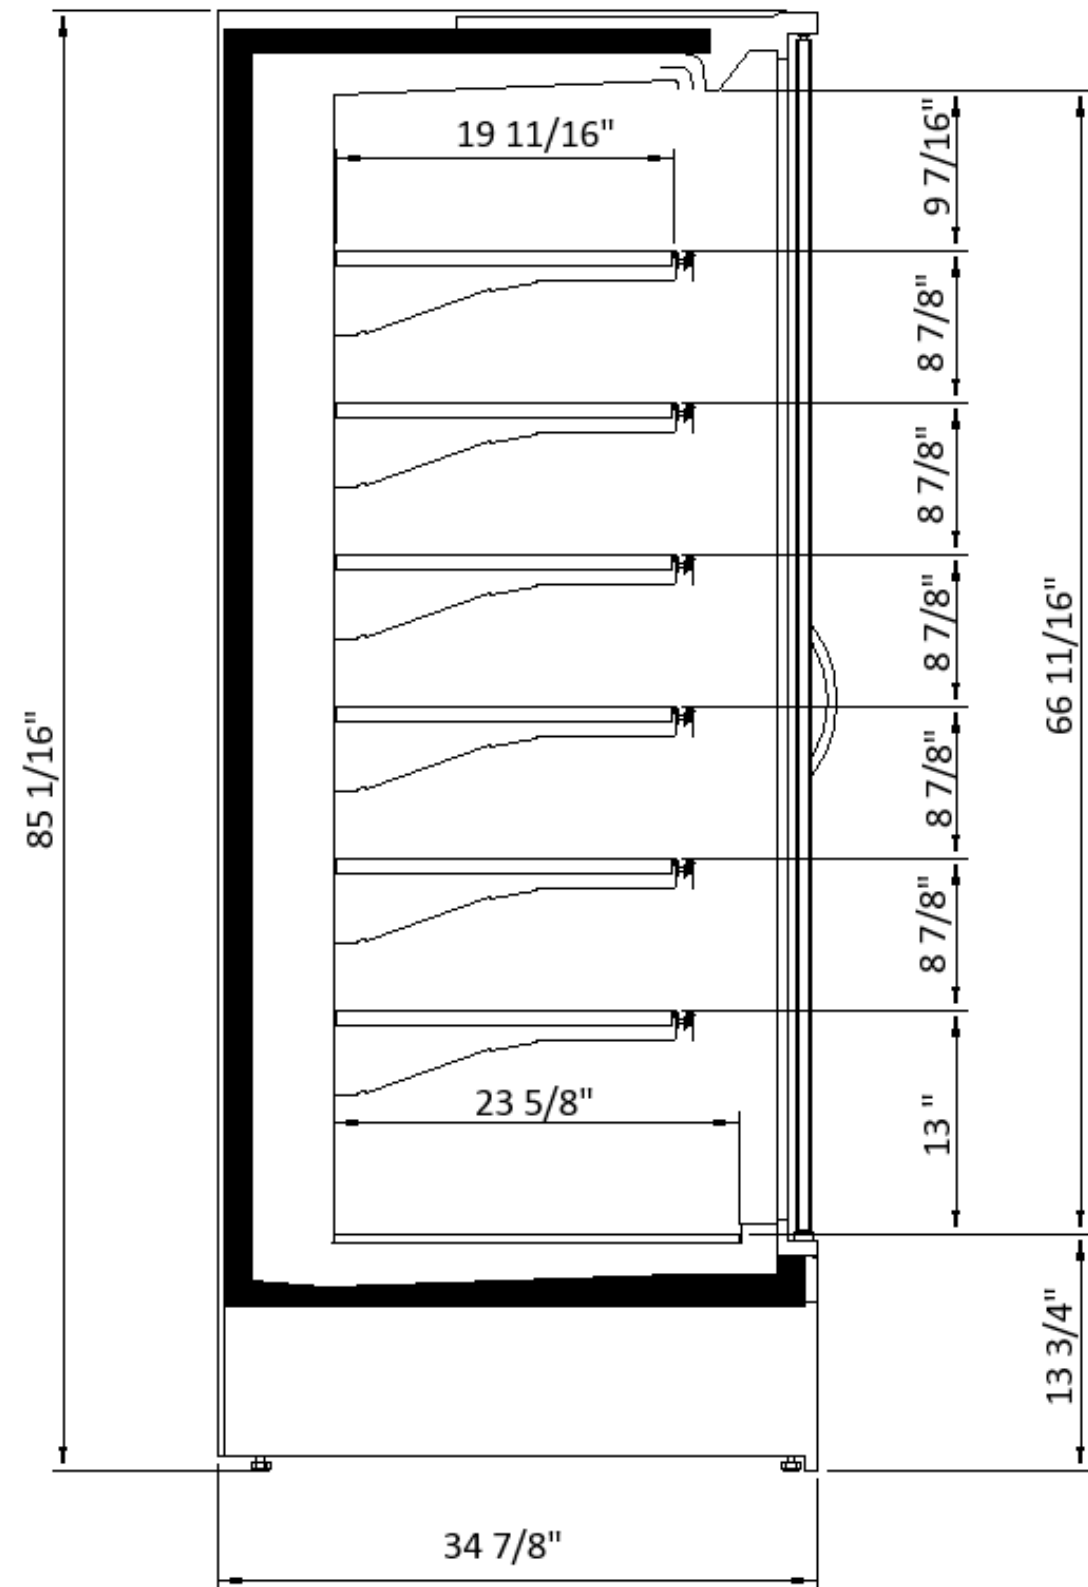

## Less heat in your store

The new evaporator technology and natural refrigerant used in the Genova OV range means that the cabinet will increase the ambient temperature by only 2c – in technical terms that is just over 0.85 kwh or 2,809 BTU's per 2.5m section. We do, however, recommend that your store is air conditioned for optimal cabinet performance.

## Standard features

- Panoramic side glass
- Panoramic hinged doors
- Sliding doors
- Vertical LED
- Temperature class 3M1
- R290 refrigerant (HT)
- New generation EC fans
- Removable condenser grill
- PVC bumper
- Hot gas defrost
- Dixcell controller
- Anti-spark components
- New evaporator design
- Silver external
- White internal

## Accessories

- LED shelf lighting
- BWS shelving
- Produce racking
- Hanging pin bars
- Crisp baskets
- Shelf risers
- Mirrored end walls
- Glazed end walls
- Special cabinet finishes
- Stainless steel bumper
- Inverters
- Mixed air/water condensing
- Cladding
- Temperature Class 3M0

Florida OV Doors X

# FLORIDA LH

## World Class Integral Equipment

Our open Florida LH low height is the perfect answer to plug-in convenience store multideck display. Featuring 3 tier shelving and available in two depths and five lengths. Features include, R290, LED lighting and removable grill to clean the condensers. Also available with doors.

The versatility of the Florida multidecks is here demonstrated: we present the Florida OV Low Height both with and without doors, multiplexable in promotional island configuration with headcases. In the whole Florida OV LH plug in line, the maintenance of the condenser is facilitated by the front panels that can be removed without using tools. As for all the production of the RIMACOLD brand, the decorations can be chosen in the colors most suitable for the furnishings and the environment in which they are exhibited.

We strive to reduce energy consumption by enabling technologies for excellent refrigeration performance.

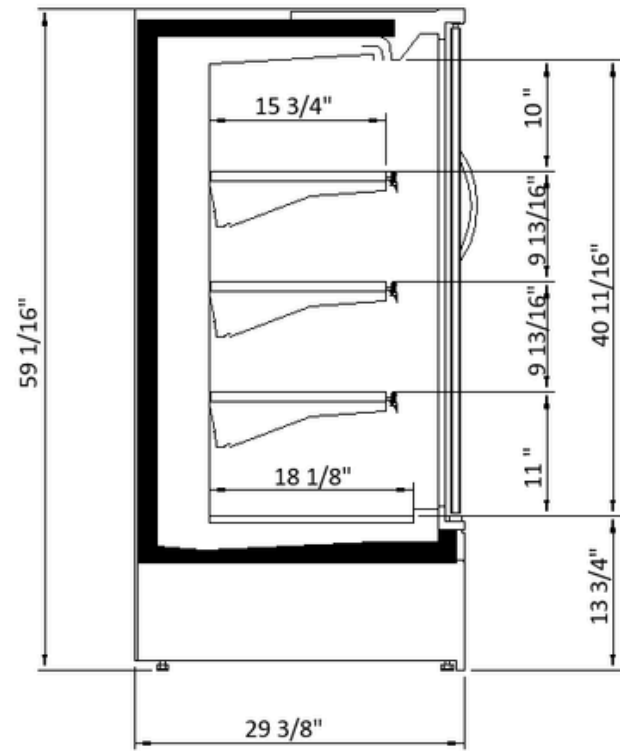

### **It's very practical**

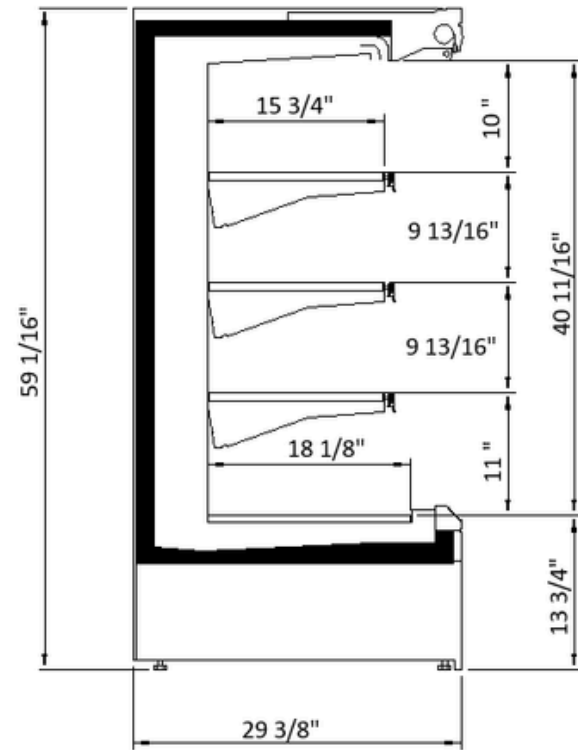

The **Overview Supermarket** line brings important functional innovations to supermarket product lines. You can find different variants of our selected models to best suit for your needs.

# ASTORIA

Low Temperature Reach-In  
-9.4°F / -13°F

Effective full glass door remote frozen food cabinet. Upright frozen food merchandising with a small footprint the Astoria with its slim design and full display offers greater product visibility. Increase your sales with Astoria enhanced vision.

The Astoria is an extra tall reach-in cases designed for maximum energy savings, refrigeration performance and merchandising impact.

## Standard features

- 4 or 5 shelves with price holder depending on the height
- Digital Thermometer
- Fan assisted cooling
- Grey ABS bumper
- Mechanic expansion valve
- Remote cabinet, with multiplexable linear modules
- Ultra-panoramic hinged and double glazed doors
- Vertical LED lights

## Accessories

- Panoramic or solid endwalls
- Control board master and slave
- Electronic control
- Electronic valve
- Grid dividers
- R448a, R410a, CO2 refrigerants
- Stainless steel bumper
- Ultrabright doors with antifog foil
